Q13. Develop Critical Thinking

The way we see the world and relate to others is intrinsically connected to our own set of values that govern the way we decide to live. However, the influence of fashion, consumerism, pop culture, broken homes, social unrest, and the media is all-pervasive. For many people, teachers and students alike, this influence goes unquestioned. Critical thinking, if successfully taught at this level, becomes the antidote for individual and social illiteracy. For the authors, critical thinking should constitute an indivisible part of the overall educational process. Facione (1995) comments: 'Critical thinking lies at the root of civilisation. It is a cornerstone in the journey humankind is taking from beastly savagery to global sensitivity'.

Supporting the development of these skills involves reflective teaching and learning, which is highly complex and which some students may find difficult, or interpret as weakness on the part of the teacher. But in the long run, with patience on the part of the teacher, it will develop students who can view old or new material, from a variety of sources, through new eyes, using their skills to define their own stance and express it, often better in their second language, with an open-minded confidence.

- a) The world view of the human being today is influenced by a lot of things. Critical thinking cannot be taught as it involves reflective teaching and could be misunderstood.
- b) Critical thinking must be part of an individual's education but it is a difficult concept because it very often reflects a teacher as a dominating individual
- c) Critical thinking is an important aspect of an individual's literacy level and his social knowhow. It is part of civilization and eventually leads to global sensitivity. Students can look at information in a variety of ways.**
- d) Reflective teaching is another aspect of initial thinking and it could lead to individual and social illiteracy.

Q14. The construct of democracy rests on informed choice and governance on informed policy. Answers to critical questions are stranded in the arena of claims and counter claims. Measures of progress are simply not known or available . The debate to job creation is a mystery of sorts. The public are not aware that the Center and States spend crores on education, health and social services. Take education. Barely a few of ClassV students can read a Class II text, the poor are switching to private schools and over 33% of million-plus schools do not maintain a feasible pupil teacher ratio.

- A) Being informed is an important aspect of any democracy. This information is not available especially in the area of education, health and social services.**

B) Answers are often given but they need to be deciphered accurately. Job clarity is available but sometimes it is a mystery. There is confusion about information.

C) Health and social services is clearly communicated but education remains an area of ignorance. Claims and counter claims create even more confusion.

D) Crores are spent on many areas of growth but there is no accountability for information. Parents are switching to private schools as the information on education is available there.

Case Question with 2 questions

Direction: Answer the Question, based on the following information. Indicate which of the statements given with that particular question, is consistent with the information given in the passage below.

A Holistic Viewpoint

It is now recognised by modern science that the universe at the subatomic level does not have solid material objects, but consists of only wavelike patterns which represent probabilities of interconnections between other interconnections, all of which together constitute an inseparable web of inter-relationships constituting the entire universe. Fritj of Capra therefore, views the universe not as “an assemblage of independent parts” but as “a dynamic web of inter-related events” in which each part of the web determines the structure of the whole. Geoffrey Chew views such inter-penetrating and interdependent relationships in the universe in terms of a “bootstrap” theory which implies that all forces in the universe are inseparably linked together, every part affects every other part, and the whole world is held together so to say, by bootstraps. David Bohm refers to a holographic concept which implies not only that every part is connected with every other part within the whole but also that, in a sense, each part contains the

whole. This, according to David Bohm, recognises the “Undivided wholeness” of the entire universe instead of the classical idea of analysability of the world into separately and independently existent parts.

Q20. Choose the appropriate option:

- a) there are many solid material objects in the universe
- b) the entire universe has a web of inter-relationships**
- c) the universe comprises of a number of independent parts
- d) these independent parts determine the structure of the web

Q21. Choose the appropriate option:

- a) the holographic theory speaks of the exclusiveness of each part.
- b) the world can be analysed into separate independent parts.
- c) the classical idea recognizes the concept of wholeness.
- d) the boot strap theory speaks of interdependent relationships**

Direction: In the following sentence a part of the sentence is underlined. Beneath each sentence four different ways of paraphrasing the underlined part are indicated. Choose the best alternative among the four options.

Q22. The police searched everywhere but they drew a blank.

- a) upset

Case Question with 10 Questions

Direction: Read the passage given below. Choose the best option for the question.

IOT has had an impact across all fields, be it industries, government, small or large businesses and even for Personal Consumption.

What is IOT (Internet of things) you might ask. It's been a growing topic of conversation for some time now. Put in the simplest term it means anything that has an on and off button and is connected to the internet for receiving, analyzing, storing or sending data. This could mean anything, from the watch that you wear to airplanes that can be controlled from a remote location. According to the analyst firm Gartner, by the year 2020 we'll have over 26 billion connected devices. That could mean people to people, people connected to things and things connected to things. The new rule of the future is going to be "Anything that can be connected will be connected". Take for example that when you set an alarm to wake up and that alarm goes off it not only wakes you up but also brews your coffee, sets the right temperature of water for your bath, puts on the television to bring you the latest updates from around the globe and all this before you even put a foot out of your bed. This is all done by simply getting the network of interconnected things/devices that have embedded sensors, network connectivity, software and necessary electronics that collect and exchange data.

To show how far we have come with technology and connectivity, we have smart watches such as Fitbit, Garmin to name a few that have changed the way we look at time. We have one device that not only tells us the time but also tracks the number of steps, calories and our heart rate. This watch is actually connected to our phone so with just one turn of the wrist one can tell who is calling or what messages have been received without having to dig through pockets or handbags.

IOT is making its presence felt in health care as well. Doctors can now remotely monitor and communicate with their patients and health care providers can benefit from this. Whether data comes from foetal monitors, electrocardiograms, temperature monitors or blood glucose levels, tracking this information is vital for some patients. Many of this requires follow up interaction

with healthcare professionals. With smarter devices that deliver more valuable data it can reduce the need for direct patient- physician interaction.

Take for instance in the sporting field, minute chips are being attached to balls and bats which will transmit information of how fast the ball is travelling and a batsman's moves, the time, the angles, the pressure on the bat at different positions, data of the muscle stretch if he's hit a six so on and so forth. Formula one cars are also being fitted with these sensors which relays information on the minute moves being made by the driver. Chips are also being put into wearable devices of sportsmen to detect sub-optimal action of any body parts to show signs of stress or strain which will help in the early detection of injuries and take preventive measures.

IOT has had an impact across all fields, be it industries, government, small or large business and even for personal consumption. IBM, Google, Intel, Microsoft and Cisco are some of the top players in the IOT spectrum.

With billions of devices connected security becomes a big issue. How can people make sure that their data is safe and secure? This is one of the major concerns in the IOT that becomes a hot topic. Another issue is with all these billions of devices sharing data companies will be faced with the problem of how to store, track, analyse and make vast sense of the information being generated. Companies are monitoring the network segment to identify anomalous traffic and to take action if necessary.

Now that we have a fair understanding of IOT let's see what impact it's had on the education sector. The only constant in our lives is change and learning. From the get go we learn, be it to the walk, talk or run. We adapt to the changing times and constantly learn from it. Education or learning as we know it in the broader sense is the most important of all and the one that decides which way we handle those changes to impact us and the world.

Today's world is fast paced and to keep up with this we need an infusion of speed with learning. From the classroom assignments, lectures, blackboards and chalk we have come a long way to what is now known as e-learning (electronic learning) or m-learning (mobile learning). With the GenNext it is imperative to provide the right kind of education.

The rise of technology and IOT allows schools to improve the safety of their campuses, keep track of resources and enhance access to information. It ensures data quality being the top priority but also facilitates development of content allowing teachers to use this technology to create smart lesson plans and ensuring the reach of this content to any corner of the world.

Q28. How is IOT a concept of connecting?

a) It is the internet in a different form.

b) It is internet but connected to anything.

- c) It is an analysing machine.
- d) It is a data collection term.

Q29. It is said that we look at time differently now, why?

- a) It is connected to different devices.**
- b) It is in a different format.
- c) It is connected to the aeroplane.
- d) It connects people.

Q30. IOT will help in simplifying patient - physician interaction because:

- a) It helps reduce data.
- b) Doctors can remotely connect to patients.**
- c) It improves connectivity.
- d) It is a simple process.

Q31. How will IOT work in the sporting field?

- a) Through sport fields with chips.
- b) Through special machine.
- c) Through minute wearable chips which are connected.**
- d) Through special moves by the sportsmen.

Q32. Preventive measure is imperative because:

- a) It can detect anything.
- b) It identifies treatment needed.
- c) It keeps them in touch.
- d) It helps to identify stress and strain.**

Q33. One of the major concerns of IOT is:

- a) Security and privacy, data loss and tracking data.**
- b) Only security and privacy.
- c) Only data loss.
- d) Only tracking data.

Q34. Technology and IOT has benefited education considerably because it has

- a) Helped in improving the lesson.
- b) Helped keep track of all resources.
- c) Helped teachers to track.
- d) Helped with keeping up with the change in learning.**

Q35. Teachers can use this data:

- a) Only to teach with more resources

44. **Legal Principle:** One of the principles of 'Natural Justice' states that, "No person shall be a judge in his own cause".

Facts: A, a driver of B, a Branch Manager of ABC Bank was caught, suspecting theft, in the bank premises. The Bank management instituted an enquiry and made B the enquiry officer.

Which of the following statements is correct?

- A. As B is a Bank Manager and not a judge, this principle is inapplicable.
- B. Since the suspected theft was in the bank premises, the manager is the only competent person to enquire. Hence, the principle is not applicable.
- C. Since B is the employer of A, B should not be conducting the enquiry on the basis of the given principle.**
- D. The principle will be applicable, only if the theft committed by A was in relation to the car.

45. **Legal Principle:** Justice should not only be done, but also seen to be done.

Facts: L, an honest Lawyer had 200 shares in Company X. Later, L was elevated to the High Court as a Judge and had to deal with Company matters. A dispute between Company X and its creditors came before L for decision.

Which among the following proposition is true?

- A. L, as an honest person will definitely judge the matter on the merits only. So, the principle cannot apply.
- B. A judge cannot excuse himself from taking up a case posted before him by the Court Registry.
- C. L should refrain from hearing the matter as he holds shares of the Company X.**

- D. Since, L has only 200 shares he has no substantial interest in the company and hence can decide the matter.

46. Legal Principle: A person who keeps hazardous substances in his premises, is responsible for the fault if that substance escapes in any manner and causes damage.

Facts: A, an industrialist stored 1000 litres of liquid ammonia in a tank in his premises for his industrial use. There was a leakage from the tank due to which there was ammonia vapour in the surroundings. Many workers in other industries as well as his own industry and some members from the public suffered serious health hazards. Examine the liability of A, if any.

- A. A may be liable for the injury sustained by his workers only and not others.
- B. A is liable as he is responsible for the injury caused by the leakage of ammonia from his premises.**
- C. A is not liable because there was no fault on his part for the escape of the dangerous substance.
- D. A is not liable because he did not expect a leakage from the tank.

47. Legal Principle: In the law of evidence, a person missing for long and not heard of, for over seven years is *presumed* to have died.

Facts: A, B and C are children of F and M. At the age of 20, A went out in search of a job and was not contacting the family. All attempts to trace A by the family failed. Eight years after the death of the parents, B and C entered into a partition and took equal share in the property of F and M. One year after this, A returned home with his wife and two children and claimed his share in the property. Whether A's claim is legally sustainable?

- A. Since A was not heard of, for more than eight years, the legal presumption of death will apply and hence, he cannot claim a share in the property.**
- B. It was A's duty to be in touch with the family at least once in a year. The failure of this duty will disentitle him from claiming property.
- C. A will succeed because he is a legitimate son of F and M.
- D. B and C are legally bound to give 1/3rd share of the property to A.

48. Legal Principle: Gift' means transfer of certain existing property made voluntarily and without consideration, by a donor, to a donee, and accepted by or on behalf of the donee during the lifetime of the donor.

Facts: Amit executed a gift deed for property 'X' in favour of Sooraj, who happened to be Amit's loyal servant's son settled in the U.S. Two months thereafter, Amit died without leaving a will regarding his assets. Amit's children initiated steps to partition his entire property, including property 'X' among themselves. At that time, Sooraj came to India, and learning about the gift, claimed the property 'X'.

- A. Sooraj can legally get the property 'X', as soon as he gets to know about the gift.
- B. Sooraj cannot legally claim the property 'X' because, the children of Amit have already initiated steps for partition.
- C. Sooraj can claim the property 'X', because, his acceptance of the gift is implicit by his conduct of claiming the property as soon as he came to know about the gift.
- D. Sooraj apparently did not comply with the essential requirements of a gift and hence, the entire property including property 'X', can be partitioned among the children of Amit.**
